

It's tax time!

Are you prepared? Are all your books accurately detailed in a convenient computerized system? Or are you one of those shoe box organizers? The type who's going to take care of that . . . later...

Keeping your books in order is far more than just typing in a few numbers here and there and throwing your receipts in a shoe box. The effects of your accounting system extend beyond the dreaded bank reconciliation. Sound financial decisions (the ones that can make or break your business), will be dependent on accurate detailed accounting of your finances. Accurate reporting and your understanding of those numbers can mean the difference between a good decision and a bad one. Dreading that annual call to your CPA?
